

Getting New Zealand **working** again

Crewcare's new solution to
deal with COVID-19

At Crewcare, the health and safety of our clients and our team members is our number one priority.

In light of the COVID-19 situation, we have reviewed our cleaning protocols based on recommendation from public health experts and have engaged with H&S professionals locally to create new processes for our team.

Many essential businesses are asking if Crewcare has developed an **enhanced cleaning service** option for this specific period. Recently, we have developed a **unique four-step sanitation process** against the novel coronavirus, which goes beyond our standard scope of work and contract.

This solution is ideal for healthcare facilities, as well as non-health care premises such as schools, offices, and restaurants that may have suffered a case of COVID-19.

Please note that these guidelines are focused on commercial or non-commercial areas, community, non-healthcare facilities,

schools, offices, restaurants, day care centres, community centres, etc.

We clean all hard (non-porous) and soft (porous) surfaces, high touch points, electronics, furniture, and other areas per your requirement. In all levels, we remove dust or any waste or debris followed by deep cleaning using EPA-approved chemicals.

Our role in the fight against COVID-19

Commercial cleaning plays a major role in the fight against COVID-19. With deep cleaning techniques and prompt disinfection, we can effectively stop SARS-CoV-2 and other viruses from spreading.

Crewcare implements the latest safety and cleaning protocols to the highest level recommended by government and public health agencies.

Level 1

- Cleaning and disinfecting high touch points at a site with appropriate PPE including door handles, switches, taps, doors, and floors
- Complete standard clean of premises
- No closure required and work is carried out at client's requested interval
- All touch points sprayed with sanitiser
- Floors and soft furnishings vacuumed

Level 2

- Cleaning and disinfecting all Level One areas and everything up to two (2) metres high including walls, glass, and under furniture with full PPE
- Includes entrance, foyer, reception, office areas, meeting rooms, stairs, and corridors
- Kitchen and lunchrooms are also covered
- Toilet areas included
- With extra precaution taken if the area is possibly high-risk or bacteria or virus infected
- Involves closing off areas visited or frequented by people

Level 3

- Cleaning and disinfecting using a high-level procedure that involves fogging with suitable chemicals
- Heat treatment with temperature maintained according to site and room condition
- Vaporisation or dry fogging process with rooms airtight and workers in full PPE gear
- Surface cleaning based on CDC guidelines
- Extracting all fog and toxic gas from the room
- Equipment and personnel decontamination with professional equipment

Cleaning for COVID-19 (Coronavirus) prevention

This special coronavirus cleaning service (Level 3) involves fogging, which kills everything but 0.0001% of bacteria, fungi, and viruses. It's the best, most effective way of getting rid of some of the most harmful pathogens, including methicillin-resistant Staphylococcus aureus or MRSA.

The 4 Steps in Crewcare's Level 3 Cleaning Process

1

Heat treatment to help break down the protein layer of the virus

2

Fogging using EPA-approved chemicals for maximum effectiveness and coverage for all areas

3

Surface cleaning for all frequently touched surfaces such as handrails, door knobs, etc.

4

Decontamination process that applies to the worker and their equipment

COVID-19 management and compliance

We can prepare and implement a COVID-19 management plan for your business that includes risk management and selection of chemicals and methods along with other health and safety processes and plans.

- We can develop and implement a **disinfection plan** for any workplace.
- We'll develop a **businesses continuity plan** (BCP) for working during COVID-19 Alert Levels 1-4.
- We have consulted a team of scientists and H&S professionals who have the **highest qualifications and experience** in the field to deliver this to your organisation.

**A high-level of
cleaning is required
for COVID-19.**

If you're looking for a reliable cleaning company to handle your deep cleaning or infection control requirements, feel free to contact Crewcare at 0800 800 209.
